

## IB 10/15 L2P DRY ICE BLASTER

### SPONTANEOUS CLEANING BECOMES POSSIBLE!

The IB 10/15 L2P provides on demand dry ice production and blasting all in one machine. Enabling a quick setup and ready to use solution with fresh high-density pellets. Excellent for a wide range of applications requiring intermittent or consistent cleaning.

- **ONLY** Dry Ice Blaster in the market that can produce dry ice pellets on demand using liquid CO2
- Bottles can be stored indefinitely & ordered from almost any gas suppliers
- Effectively cleans resin, oil, grease, tar, adhesives, varnish, wax, and more
- No more planning in advance or waiting for dry ice deliveries, simply use what you need!
- Time is saved by cleaning in place due to little or no disassembly

## IB 10/15 L2P DRY ICE BLASTER

### EASY TO USE DISPLAY

- Simple To Read interface makes operation accessible for new or experienced users.
- View and change parameters such as dry ice production; air pressure, and blasting time.
- Displayed alerts to minimize downtime and access to easy troubleshooting.

### Liquid To Pellet

- Liquid CO2 is converted to dry ice with built-in integrated pelletizer.
- CO2 can be ordered and stored, enabling dry ice cleaning on demand.
- Produces dry ice quickly and efficiently, minimizing setup time for the immediate use.

### Toolless Nozzles

- Quick release nozzles allow the blaster to be used on a variety of cleaning tasks.
- Ensure optimal cleaning performance by matching nozzle type suited for the highest rate of material removal.
- Easily switch between nozzles to customize the cleaning process for different materials and surfaces.
